

PRODUCT CARD

GREENFOND 120 WS

GREENFOND 120 WS is an excellent fireproof material that also protects the surfaces of roof elements against fire

GREENFOND 120 WS is a synthetic product made of fiberglass.

GREENFOND 120 WS is an excellent fireproof material commonly used in construction, also protecting the roof surfaces from fire. The fiberglass veil is an excellent barrier separating waterproofing roofing from expanded polystyrene (EPS) and styrodur (XPS). It extends the life and durability of the surfaces to be separated, and also strengthens their resistance to water.

TECHNICAL DATA OF THE PRODUCT:

Material	fiberglass
Thickness	1,25 mm +/- 10%
Surface weight	120 g/m ² +/- 10%
Reaction to fire	A2
Tensile strength along	270 N/50 mm
Tensile strength across	130 N/50 mm
Permissible temperature of installation in the ground	-30°C/+60°C
Colour	white
Roll dimension	2x100 m/200 m ²
Product type	120 g/m ² (fireproof)
Article numer	10.1212
