GREENFOND

MODUL TRAY modular green roof

GREENFOND MODUL TRAY modular extensive green roof for fast installation on flat and pitched roofs

GREENFOND TRAY MODULES are easy and quick to install thanks to the patented latch system.

The integrated drainage system contributes to the beautiful, overgrown with plants roofs all year round. GREENFOND MODUL TRAY is a mixture of stonecrop in 8-10 varieties. It is grown on a specially developed mineral substrate thanks to which the green roof can be maintained for a long time.

APPLICATION AREA

GREENFOND MODUL TRAY can be used directly on the roof for an immediate effects. The module can be used on flat and slightly sloping surfaces up to 15 degrees.

DELIVERY AND INSTALLATION

GREENFOND MODUL TRAY can be ordered in pieces. The dimensions of each module are 45 x 49.5 cm. Installation of the modules is very easy. The modules can be connected with each other using latches. To protect the roofing, it is recommended to place protective material under the module

PRODUCT SPECIFICATIONS:

Coverage	95%
Quantity per m ²	4,49 pcs
Dimension of the module	45 x 49,5 cm
Weight of the dry module	12 kg module/ 53 kg m ²
Weight of the module saturated with water	18 kg module/ 80 kg m ²
Number of pieces on a pallet	58
Thickness	8,5 cm
Quantity per pallet m ²	12,92 m ²
Pallet dimensions	100 cm x 100 cm
Article numer	35.1212

PRODUCT CHARACTERISTICS:

Modular assembly system
Easy to install
Possibility of assembly throughout the season
Immediate greening effect
Light weight
The possibility of replacing a single element
Material stable at different atmospheric conditions
High water accumulation capacity
