GREENFOND

**MTR 10** mixture of grass seeds

GREENFOND MTR 10 is a mixture of grass seeds properly selected for use on extensive green roofs

GREENFOND MTR 10 is an optimal combination of seeds with different characteristics, thanks to which we obtain an interesting form of the green roof.

The GREENFOND MTR 10 seed mixture can be used on roofs with an inclination angle of 0-5% and on pitched roofs of up to 45%. In this case, it is recommended to mix the seeds with the roof substrate to protect against leaching and blowing off.

Seeds in accordance with the FLL guidelines.
