GREENFOND

MODUL TRAY PL

GREENFOND MODUL TRAY PL modular extensive green roof for fast installation on flat and pitched roofs

The integrated drainage system creates a durable and stable solution for an extensive green roof all year round. GREENFOND TRAY PL contains a mixture of 6-8 sedum varieties, which was created on a specially developed mineral substrate. By using a mineral substrate, you can keep a green roof for a long time.

APPLICATION AREA:

GREENFOND MODUL TRAY PL is a ready-to-use product and can be used directly on the roof to obtain an immediate green effect. The module can be used on flat and slightly inclined surfaces with an inclination of up to 10 degrees.

DELIVERY AND APPLICATIONS:

GREENFOND MODUL TRAY PL can be ordered in pieces. Module dimensions 40 x 60 x 6.5 cm. The modules are installed by arranging them parallel to each other on the roof. To protect the roofing, we recommend placing the GF PES 300 separation and protection fleece under the modules.

MODUL TRAY PL

PRODUCT SPECIFICATIONS:

Coverage	95%
Weight of the dry module	11 kg/modul / 46 kg/m ²
Weight of the module saturated with water	16 kg/modul / 67 kg/m ²
Thickness	6,5 cm
Dimension of the module	40 x 60 cm
Quantity per m ²	4,16 szt.
Quantity per pallet m ²	11,52 m ²
Number of pieces on a pallet	48 szt.
Pallet dimensions	100 cm x 100 cm
Article numer	35.1212-1

PRODUCT CHARACTERISTICS:

Modular assembly system
Easy to install
Possibility of assembly throughout the season
Immediate greening effect
Light weight
The possibility of replacing a single element
Material stable at different atmospheric conditions
High water accumulation capacity
