GREENFOND

SEDUM MATT TUNDRA P

GREENFOND SEDUM MATT P stonecrop mat - a mixture of stonecrops appropriately selected in the form of a mat fixed in a board for use on green roofs

GREENFOND SEDUM MATT TUNDRA P consists of ten different varieties of sedum.
The plants grow on a mat made of coconut fiber and a specially developed substrate.
Sedum, being a succulent capable of storing water in its leaves, is perfectly suited for cultivation in various weather conditions.

The sedum mat provides an impressive green roof immediately upon installation.
Thanks to the carefully selected plant mix, it also works excellently as a green layer on tram tracks.

The vegetation coverage of the mats at the time of delivery may vary depending on the season, but it is always at least 80%, in accordance with FLL guidelines.

GREENFOND

SEDUM MATT TUNDRA P

TECHNICAL DATA OF THE PRODUCT:	
Product type	Stonecrop mat in the board
Thickness	2-4 cm substrate + plants
Number of varieties	min. 8
Size	1,0 x 1,0 m / 1m^2
Pakowanie	EURO 120 x 80
M^{2}per pallet	approx. 35 m^2(depending on humidity)
Weight when dry:	12-15 kg per m2
Saturated weight:	15-22 kg per m2
Product no.	351205-1

APPLIED PLANTS IN THE MAT:
Sedum stonecrop - sedum acre
stonecrop white - sedum album
sedum stonecrop - sedum floriferum
sedum stoner - sedum hybridum
sedum Kamtschaticum
sedum Reexum Rupestre
sedum Spurium Coccineum Purple Carpe
sedum sexangulare;
sedum Spurium Summer Glory
sedum Stoloniferu
